SUMMARY: This is a review of an SIP report for a half active and half inactive landfill at which arsenic and PAHs have been detected on site and some migrating off site.

Ground water is used in the area for drinking water but whether drinking water wells are located within the 4 mile radius is not known.

It is not known whether surface water intakes are located within the surface water target distance.

This is an active facility and a RCRA non-filer. The SF recommendation is No Further Remedial Action Planned. Concur with referral to the TNRCC for further appropriate action.
